Three Year Permit Extension – Sambarabougou

Bassari Resources Limited (ASX:BSR) is pleased to announce that the Sambarabougou Permit within which the Makabingui Gold Project is located has been granted a three year extension from 13 September 2013.

The Sambarabougou Permit contains the one million ounce gold resource at the Makabingui Gold Project along with numerous gold prospects including Makabingui South where a mineralised zone 6-8 kilometers long has been interpreted from RAB and RC drilling.

During the three year extension period the Company will advance activities focused on unlocking the much larger potential to delineate additional gold resources and the development of existing defined resources.

This special extension highlights the strong relationship the Company has with the Government of Senegal. It also highlights the commitment of the President, the Minister of Energy and Mines and the Senegal Department of Mines and Geology in supporting and actively encouraging mining investment in Senegal.

The Sambarabougou Permit is one of the Company's three exploration permits which cover an area of 850km² over the prospective Birimian Gold Belt within the Kedougou Kenieba Inlier (Figure 1). The Moura, Sambarabougou and Bounsankoba permits are located in the Tambacounda region of south eastern Senegal some 650km east of the capital city of Dakar (Figure 2), and approximately 70km north east of the town of Kedougou.

“With the proven success to date by the Bassari Team making gold discoveries and importantly delineating gold resources, the permit extension is a key milestone to build on that success. We would like to thank the Minister of Mines and his Department for their ongoing support for Bassari,” said Mr Jozsef Patarica.
