Gold developer Bassari Resources Limited (ASX: BSR) is pleased to report on activities at its gold projects in Senegal, West Africa.

Makabingui Gold Project
- Final Public Meeting Clears Way for Production Permit

Corporate
- Board and management changes
- Share Purchase Plan closed 1 April 2015 raised $959,000
- Placement 1 April 2015 raised $100,000
- Convertible notes April and June raise additional $200,000
- $660,000 raised subsequent to end of quarter

Bassari’s Executive Chairman Alex Mackenzie said: “Key focus for the quarter was the preparations with government authorities ahead of the Public Meeting in the Missira village on 14 July 2015. The meeting was an overwhelming success with all in attendance giving their approval for the Project.

The Public Meeting approval was the final pre-requisite to convert the exploration permit to a production permit.”
The successful completion of the Environmental Impact Study (“EIS”) process in relation to the Bassari-WATIC JV Makabingui Gold Project paves the way for the grant of a production permit.

The process involved the preparation of independent environmental studies on the development of the project and the mine rehabilitation program. These studies raised no major environmental problems and were validated at a Governmental environment technical meeting.

The final step in the process was to hold a public meeting to examine the impact of the project on the local people. This meeting was held in the Missira village on 14 July 2015. The meeting was attended by:

- Administrative authorities (Governor of Kedougou, the Saraya Prefect, the Sabodala Sous-Prefet);
- Local authorities (Maire of Missira, village chiefs, regional council representatives and many villagers from the surrounding areas.

All in attendance supported and approved the project.

As a result the public meeting notes will be prepared by the environmental department of Kedougou and will be sent to the Direction Environment in Dakar. The Direction will make the environmental attestation of conformity to complete the Sambarabougou Mining Concession application.

This public meeting approval was the final pre-requisite to convert the exploration permit to a production permit.

We acknowledge and are encouraged by the ongoing support provided by the community and the government departments involved throughout the assessment process.

**CORPORATE**

During the quarter the Board underwent a number of changes and welcomed Peter Spivey, a successful mine developer and operator with significant experience in the gold industry, to the Board. Peter is based in Dakar, Senegal and having overseen the development of the Sabodala Gold Mine in Senegal, he will be a major addition to the Board.

In addition to Peter, Bruce van Brunt a mining engineer/geologist has joined Bassari’s consulting team. Bruce also resides in Dakar and has played an important role in the development of the Sabodala Gold Mine.

The former Managing Director, Jozsef Patarica resigned, effective 14 June 2015 and Director and consulting geologist, Chris Young retired, effective at the conclusion of the Annual General Meeting of the company on 29 May 2015. Both of these gentlemen contributed so much to Bassari over many years and the great success of what has been achieved to date resulted from their technical expertise and dedicated work ethic.
A Share Purchase Plan (SPP) was completed closing 1 April 2015 which raised $959,000. The SPP was announced on ASX on 17 March 2015 and was made available to eligible shareholders on the company share register on the record date, 16 March 2015. The issue price of the shares issued under the SPP was $0.0091 (0.91 cents) per each ordinary share.

The funds raised by the SPP provide working capital and funds to further progress the development phase of the Makabingui Gold Project.

A placement of 10 million ordinary shares at $0.01 (1 cent) per each ordinary share was made on 1 April 2015 raising $100,000 before costs to provide working capital and funds to further progress the development phase of the Makabingui Gold Project.

In addition to the two fund raisings above, a further two tranches of the convertible note facility in place with BCM International Limited were completed, the first on 2 April 2015 issuing 6.25 million convertible notes at 1.6 cents each convertible note, raising $100,000 and the second, completed on 15 June 2015 also issuing 6.25 million convertible notes at 1.6 cents each convertible note and raising $100,000.

Since the end of the quarter the company has raised by placement, a further $660,000 at $0.01 (1 cent) each ordinary share.

The Company’s Annual General Meeting was held on Friday 29 May at 3.30pm and all resolutions put to the meeting were passed.

**MAKABINGUI GOLD PROJECT**

The Makabingui Gold Project currently hosts a Mineral Resource (*Note 1*), which comprises 11.9 million tonnes averaging 2.6 g/t gold for a contained 1 million ounces of gold classified into the Indicated and Inferred Resource categories. The initial open pit mining phase focuses on the Indicated Resource based on a conventional gravity and Carbon in Leach (CIL) processing circuit. The Open Pit Feasibility Study for the initial mining phase delivered outstanding results:

*Makabingui initial stage high grade Open Pit Project Feasibility Study summary at US$1200/oz gold price:*

- Mined ounces: 180,000 ounces
- Production (recovered gold): 171,000 ounces
- Average annual gold production: 50,000 ounces
- Average gold grade to the mill: >5.6 g/t gold
- High processing recovery: 95%
- Processing rate: 300ktpa
- Initial project mine life: 3.4 years
- Cash Cost (C1): US$683/oz
- Low additional capital: US$12M
- NPV (8% discount rate): US$63M
- IRR: 404%
- Pre-capex free cash flow (after tax): US$88M
- Payback from production start: <12 months

An Underground Scoping Study has been undertaken providing an assessment of the potential for an underground development phase for the Makabingui Gold Project within the one million ounce gold resource. Underground development would commence on
Completion of Pit 1 mining operations and utilise existing infrastructure and 300ktpa processing plant factored into the Open Pit Feasibility Study for the development of four high grade open pits.

Note 1: Prepared and disclosed under the JORC Code 2004 and remains unchanged

PROJECT LOCATION

Bassari holds a 70% interest in each of three contiguous exploration permits; Sambarabougou, Moura and Bounsankoba, covering approximately 790km² in a central location of the highly prospective Birimian Kenieba Inlier (refer Figure 1). The permits are located approximately 750km east of Senegal’s capital city of Dakar and about 70km north-east of the town of Kedougou, and span 80km strike length of parts of a major crustal shear zone, the Main Transcurrent Shear Zone (MTZ), a well-defined gold mineralised structural corridor. The Kenieba Inlier hosts several multi-million ounce gold deposits and extends into the bordering countries of Mali and Guinea (refer Figure 2).

Figure 1 – Bassari’s Permits with Project & Prospect Locations
Melbourne-based West African gold developer Bassari Resources Limited (ASX:BSR) has a strategic portfolio of exploration permits focused on the Birimian Gold Belt in Senegal. The permits cover an area of 790 km² with 80km of strike along the combined three contiguous permits. The permits are located within the Kenieba Inlier which is a +60M ounce gold region. Bassari’s vision is to discover and delineate gold resources which can be developed into profitable operations.

Forward-Looking Statement
This release may include forward-looking statements which are based on assumptions and judgements of management regarding future events and results. Statements regarding Bassari Resources Limited plans with respect to future exploration and drilling are forward-looking statements. Forward-looking statements are necessarily subject to risks, uncertainties and other factors, many of which are outside the control of Bassari Resources Limited that could cause actual results to differ materially from such statements. Bassari Resources Limited makes no undertaking to subsequently update or revise the forward-looking statements made in this release to reflect events or circumstances after the date of this release.

Competent Persons Statement
The information in this announcement that relates to the Mineral Resources and Exploration Results has been reviewed and approved by Mr Moussa Diba who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Diba is a chief geologist of Bassari Resources Limited and has over 20 years’ experience in the industry and has more than five years’ experience which is relevant to the style of mineralisation being reported upon and the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Mr Diba consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

The Mineral Resource information referred to in the announcement was prepared and first disclosed under the JORC Code 2004. It has not been updated since to comply with the JORC Code 2012 on the basis that the information has not changed since it was last reported.

Appendix 5B
Mining exploration entity and oil and gas exploration entity quarterly report

Notes

1 The quarterly report provides a basis for informing the market how the entity’s activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.

2 The “Nature of interest” (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.

3 **Issued and quoted securities.** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.

4 The definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report.

5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.

== == == == ==

In accordance with ASX Listing Rule 5.3.3, Bassari Resources Limited provides its list of exploration and exploitation permits with its June 2015 quarterly activities report.
